

**IGFAE**  
Instituto Galego de Física de Altas Enerxías

## PhD Fellowships at Institute of High Energy Physics (IGFAE), University of Santiago de Compostela on experimental nuclear physics and laser-plasma particle acceleration.

The Galician Institute of High Energy Physics (IGFAE) at the University of Santiago de Compostela, invites applications for doctoral fellows within “la Caixa” INPhINIT program. INPhINIT is a doctoral fellowship program supported through the Horizon 2020 Marie Skłodowska-Curie Actions – COFUND program to attract international early-stage researchers to the top Spanish and Portuguese research centers in the areas of Bio and Health Sciences, Physics, Technology, Engineering and Mathematics. All information about this call is available at

<https://obrasociallacaixa.org/en/investigacion-y-becas/programa-de-becas-de-posgrado/inphinit/programme-description>

Within this program, the Experimental Nuclear Physics Group offers two different profiles:

- [Unveiling the interior of neutron stars with the R3B experiment at FAIR.](#)
- [A laser generator of  \$^{11}\text{C}\$  for PET medical imaging pre-clinical studies.](#)

To access these two positions, search for IGFAE in the Research Centre selector in <https://hosts.lacaixafellowships.org/finder>

The deadline for applications is February 1<sup>st</sup>, 2019. The selection process is performed by the “la Caixa” Foundation where the candidates should apply. For additional information please contact Dolores Cortina ([d.cortina@usc.es](mailto:d.cortina@usc.es)).

Santiago de Compostela, January 1<sup>st</sup>, 2019
