5. NuPECC Long Range Plan
   All working groups are asked to cover their full list of topics; possible overlap and redundancies will be discussed on the basis of their drafts. Permission for figures should have been obtained and references only be given in the caption. ELI-NP offers technical support in the production of figures. Each working group is asked to prepare a glossary and recommendations. Facilities, detectors and computational needs will be collected from each working group report and be covered in a general chapter at the beginning. Boxes should be short, attractive and self-contained. Final proof reading will be done by the British NuPECC Members Alex Murphy and Paul Nolan.

5.1. WG1
   Diego Bettoni reports on the status of WG1 “Hadron Physics”; his presentation can be found in the “Members’ Area” on the NuPECC Website.

5.2. WG2
   François Gélis reports on the status of WG2 “Properties of Strong-Interaction Matter”; his presentation can be found in the “Members’ Area” on the NuPECC Website.

5.3. WG3
