

Mini-Workshop “Nuclear Physics in Norway”

Open session of the NuPECC Meeting

Friday, 15. June 2018, Helga Engshus, Auditorium 2

- 9:00 - 9:10 Andreas Görger (University of Oslo)
Welcome
- 9:10 - 9:40 Sunniva Siem (University of Oslo)
Nuclear structure at OCL and CERN-ISOLDE
- 9:40 - 10:10 Ann-Cecilie Larsen (University of Oslo)
Nuclear astrophysics at OCL and MSU
- 10:10 - 10:30 Therese Renstrøm (University of Oslo)
Experiments using gamma beams at NewSUBARU and ELI-NP
- 10:30 - 11:00 Coffee
- 11:00 - 11:20 Eda Sahin (University of Oslo)
Spectroscopy of exotic nuclei in the ^{78}Ni region
- 11:20 – 11:40 Tor Bjørnstad (Institute for Energy Technology, Kjeller)
Examples of Important Nuclear Physics Methods in Industry
- 11:40 - 12:00 Alexander Rothkopf (University of Stavanger)
Real-time dynamics from lattice QCD: prospects and challenges
- 12:00 – 12:30 Joakim Nystrand (University of Bergen)
The Norwegian ALICE program
- 12:30 – 13:00 Larissa Bravina (University of Oslo)
Relativistic Heavy Ion Theory
